## **Supplemental Instruction Handout**

Run the datatypesizes.cpp template in Visual Studio to fill out this handout.

| Data Type     | Size in<br>Bytes | Range                              |
|---------------|------------------|------------------------------------|
| int           |                  | -2147483648 to<br>2147483647       |
| Unsigned int  |                  | 0 to 4294967295                    |
| float         |                  | +/- 3.4e +/- 38 (~7 digits)        |
| double        |                  | +/- 1.7e +/- 308<br>(~15 digits)   |
| long double   |                  | +/- 1.7e +/- 308<br>(~15 digits)   |
| char          |                  | -127 to 127 or 0<br>to 255         |
| long          |                  | -2,147,483,648 to<br>2,147,483,647 |
| Unsigned long |                  | 0 to<br>4,294,967,295              |
